

PAWPATHS

Leading dogs in the right direction

Pawpaths is a device that attaches to your dog's collar to measure the dog's activities. It is an exercise guideline based on breed, age and weight and, when synced with the app, shows you various statistics, such as time spent resting, playing and walking, as well as calories eaten and burnt. An added feature is GPS tracking should your dog be of the lead and go out of sight.

Pawpaths uses Bluetooth technology and works with iOS, Android phones and tablets.

Home Screen: Shows a large Beagle icon, the Pawpaths logo, and the tagline 'Leading dogs in the right direction'.

Profile Page: Displays the dog's profile picture (Pug named Carlos), breed (Pug), gender (Male), age (4 years, 1 month), weight (9.8 kg), and activity level (Walk, medium level). Below this are four navigation icons: Walks, Feeding, Charts, and Tracker.

Activity Page: Shows a summary for Wednesday, October 4th at 16:35. It includes a goal of 50mins (70% completed), a congratulatory message, and activity details for Playing (20mins), Walking (30mins), and Resting (23hrs 10mins). Below this are four navigation icons: Walks, Feeding, Charts, and Tracker.
